

To whom it may concern

I have had the pleasure to hire Tony Sprando on multiple occasions to work with the School District design, purchase and install instructional audio visual equipment into multiple schools. This includes video conferencing in our Wall Street Lab, installing media connectivity into several classrooms in Mountain view High, video technology into the Culinary Arts Room at Bend High and others. Tony provided new product training at the District Level and user-level, for teachers. He continues to offer his consulting time to me for new projects.

If you are looking for someone to evaluate your current technology and present practical solutions moving forward, I recommend Tony Sprando.
