Letter of Recommendation

July 8, 2010

To Whom This May Concern,

Audio Visual Presentations, Inc. provided and installed the Media equipment for our new two story 30,000 square foot Campus Center Building.

Audio Visual Presentations, Inc. was originally presented with a "boiler plate" AV design and created custom solutions to accommodate the space requirements and needs of our end users. The Campus Center Building presented many challenging spaces including a large Rehearsal Hall, a multimedia seminar room with optional divider wall, and workstations that needed to satisfy the requirements of many different users.

Changes were made throughout the process, and A/V Presentation worked well with a team approach to address the needs of the end users, IT staff, and construction management team. Having a local firm gave us flexibility in scheduling meetings and for on-site problem solving.

Questions and field adjustments were met with quick response even after the project was completed.

Audio Visual Presentations, Inc. was knowledgeable, professional, and very customer oriented. They can give excellent local support, provide complex A/V solutions, and it was a pleasure working with all members of their staff.

Yours truly,

A handwritten signature in black ink, appearing to read "Joe Viola".

Joe Viola
Director of Campus Services
